Summary

Enthusiastic Computer Science student passionate about scalable applications and AI-driven solutions. Built end-to-end ML/NLP pipelines such as a resume classifier for job role prediction. Developed full-stack web applications with integrated Twilio-based alert systems. Quick problem solver with a focus on building real-world, impactful projects.

Technical Skills

Languages: Python, Java, C, HTML, CSS, JavaScript

Technologies: Node.js, Express.js, React.js, Scikit-learn

Tools: Git, Power BI, VS Code

Databases: MongoDB, MySQL

Experience

- **Founder and Designer — SeaOfDrip (Remote)** Apr 2025 – Present
 - Marketed and sold T-shirts via Instagram and WhatsApp.
 - Handled end-to-end processes: design, social media marketing, customer communication, and order fulfillment.

Education

B.Tech in Computer Science Engineering (CGPA: 9.01/10.0)	2022 – 2026
Walchand Institute of Technology, Solapur	
Higher Secondary Education (77.33%)	2022
Indira Junior College, Nanded	
Central Board of Secondary Education (93.6%)	2020
Indira School, Nanded	

Projects

- **Optimizing Hospital Operations with Digital Solutions**
Technologies: MERN Stack, Twilio API
 - Developed a hospital management system with appointment booking, prescriptions, and doctor-patient chat.
 - Integrated Twilio API for real-time SMS and WhatsApp alerts.
- **ML-Powered Resume Screener (NLP Classification Project)**
Technologies: Python, Scikit-learn, NLTK
 - Developed a resume classification system using TF-IDF and Logistic Regression, achieving over 90% in predicting job roles
 - Implemented a real-time prediction feature with confidence scoring to classify unseen resumes.

Certifications

- Artificial Intelligence and Machine Learning – ExcelR
- Fundamentals of Full Stack Development – ExcelR
- Python Programming – Infosys Springboard
- AWS Cloud Foundations – Amazon

Achievements

- Participated in Smart India Hackathon (SIH) 2024
- Participated in Innovate You Hackathon 2024
